

DHYANESHWARAN N

DATA ANALYST

6369017603 | dhyaneshwaran86@gmail.com | 12/164, V.O.C Street, Avinashi, Tiruppur - 641654

SUMMARY

Detail-oriented Data Analyst with hands-on experience preparing, validating, and quality-checking large-scale structured and unstructured datasets for machine learning and analytics use cases. Skilled in Excel/Google Sheets, Power BI/Tableau, and Python (pandas) for data cleaning, analysis, and visualization. Strong analytical mindset developed through real-world data annotation and quality-assurance workflows, with a proven record of accuracy, process improvement, and cross-functional collaboration.

TECHNICAL SKILLS

- **Data Analysis & Visualization:** Power BI, Tableau, Excel / Google Sheets (formulas, pivot tables, dashboards)
- **Programming:** SQL (queries, filtering, joins, aggregation), Python (pandas, basic data manipulation & cleaning)
- **Data Quality & Annotation:** 2D/3D data labeling (CVAT, Kognic), bounding boxes/cuboids, polygons, polylines, QA validation
- **Other Tools:** Tally (financial data management), Microsoft Office
- **Core Strengths:** Analytical thinking, process improvement, cross-functional collaboration, attention to detail

PROFESSIONAL EXPERIENCE

Data Annotation Analyst — Apexon 2025 - 2026

- Validated and quality-checked large volumes of image, video, and LIDAR sensor data, ensuring dataset accuracy for downstream analytics and machine learning model training.
- Performed 3D data labeling (bounding cuboids, polylines, polygons) to structure raw sensor data into clean, analyzable records identifying roads, pedestrians, vehicles, and traffic signals.
- Worked across ADAS projects (Lane Detection, Object Detection, Parking Detection) using CVAT and Kognic, maintaining strict data accuracy and consistency standards in a production environment.
- Identified data inconsistencies and recommended process improvements, streamlining the annotation-to-analysis workflow and reducing rework.
- Collaborated with cross-functional ML and QA teams to translate raw data into model-ready, analysis-friendly datasets.

PROJECTS

Hospital Patient Data Analysis

- Analyzed hospital patient records (admissions, treatment, and discharge data) using Excel to identify trends in patient inflow, department-wise load, and treatment outcomes, presenting insights through summary reports.

E-Commerce Sales Analysis ■

- Cleaned and analyzed e-commerce sales data using Python, Pandas, Matplotlib, and Seaborn to identify monthly sales trends, top-performing subcategories, regional performance, and key business insights. [View Project on GitHub.](#)

HR Analytics Dashboard (Power BI)

- Built an interactive Power BI dashboard tracking employee attrition, headcount, and performance metrics across departments, job roles, and demographics, helping identify key drivers of employee turnover.

EDUCATION

B.Com (E-Commerce) 2022 - 2025

KPR College of Arts, Science and Research, Coimbatore

HSC 2022

Rayar Kalvi Nilayam, Avinashi, Tiruppur | 82%

SSLC 2020

Rayar Kalvi Nilayam, Avinashi, Tiruppur | 78%

CERTIFICATIONS

- Certified in Tally for Financial Management — Great Learning (2023)
- Data Analytics Certification — In Progress (2026)
